To Whom It May Concern:

I have attached a copy of the City's "Driveway Openings in Curbs" requirements along with the ordinance showing a "typical driveway curb cut". Please note that a permit is required for cutting an existing curb. I am also attaching a list of some of the company's who have performed such work in the past in the City. You have the option to use whoever you desire providing they acquire the proper permit and cut the curb according to the attached design.

I would also ask that when moving heavy equipment such as: concrete trucks, large lumber trucks and so on, you put a "filler" such as some 2x4's etc. in the curb area to help eliminate damage that could be incurred. Repair of damage to curbs will be the responsibility of the individual who acquired the building permit.

Your cooperation in this matter is greatly appreciated and if you have any questions please contact:
